

## Program Product

## OS and DOS PL/I Language Reference Manual

OS Optimizing Compiler	5734-PL1
OS Resident Library	5734-LM4
OS Transient Library	5734-LM5

(These program products are also available as composite package 5734-PL3)

Release 4.0

OS Checkout Compiler	5734-PL2
----------------------	----------

Release 3.0

DOS Optimizing Compiler	5736-PL1
DOS Resident Library	5736-LM4
DOS Transient Library	5736-LM5

(These program products are also available as composite package 5736-PL3)

Release 6.0

The IBM logo, consisting of the letters 'IBM' in a bold, sans-serif font, with each letter formed by a series of horizontal bars of varying lengths.

This publication was produced using the  
IBM Document Composition Facility  
(program number 5748-XX9) and  
the master was printed on the IBM 3800 Printing Subsystem.

### First Edition (September 1981)

This is the first edition of a new publication that applies to the releases listed below and to any subsequent release of these compilers or libraries until otherwise indicated in new editions or technical newsletters. This publication replaces OS PL/I Checkout and Optimizing Compilers: Language Reference Manual, GC33-0009, and DOS PL/I Optimizing Compiler: Language Reference Manual, GC33-0005, which are now obsolete.

This edition applies to:

- Release 4.0 of OS PL/I Optimizing Compiler, Program Product 5734-PL1
- Release 3.0 of OS PL/I Checkout Compiler, Program Product 5734-PL2
- Release 4.0 of OS PL/I Resident Library, Program Product 5734-LM4
- Release 4.0 of OS PL/I Transient Library, Program Product 5734-LM5
- Release 6.0 of DOS PL/I Optimizing Compiler, Program Product 5736-PL1
- Release 6.0 of DOS PL/I Resident Library, Program Product 5736-LM4
- Release 6.0 of DOS PL/I Transient Library, Program Product 5736-LM5

The changes for this edition are summarized under "Summary of Amendments" following the preface. Because the changes are extensive, they are not marked by vertical bars in the left margin.

Changes are periodically made to the information herein; before using this publication in connection with the operation of IBM systems, consult the latest IBM System/370 and 4300 Processors Bibliography, GC20-0001, for the editions that are applicable and current.

It is possible that this material may contain references to, or information about, IBM products (machines and programs), programming, or services that are not announced in your country. Such references or information must not be construed to mean that IBM intends to announce such IBM products, programming, or services in your country.

Publications are not stocked at the address given below; requests for IBM publications should be made to your IBM representative or to the IBM branch office serving your locality.

A form for reader's comments is provided at the back of this publication. If the form has been removed, comments may be addressed to IBM Corporation, P.O. Box 50020, Programming Publishing, San Jose, California, U.S.A. 95150. IBM may use or distribute any of the information you supply in any way it believes appropriate without incurring any obligation whatever. You may, of course, continue to use the information you supply.
